

Entrance Requirements

Parents or guardians of children entering NH public school or day care must provide school officials with documentation of the child's current physical exam (not older than one year of start date) and complete immunization documentation. The Hampton School District provides a form for you to submit to your health care provider to complete this requirement. Your child may attend school when all immunization and physical exam information is on file at school and has been reviewed by the nurse.

Children transfer from other schools fairly frequently here in Hampton. To expedite the transfer process for new students the following is helpful information.
